

QuickFix® RopeLight Adapter

Predecessor: 244-034

001-142

Description

Thanks to their double insulated rubber cable, our outdoor products are particularly robust and durable, thus offering a long service life. Each individual LED diode has a protective polycarbonate cap glued securely over it ensuring that no water or moisture can seep in - there is nothing to work loose and thereby interrupt the electrical current. The patented and quality-tested Quick-Fix® System meets IP rating IP44 and allows compatible 230V products to be extended and connected together without problems. Particularly suited for trees, facades and buildings.
